Minecraft Worlds

Start

We bought Minecraft just after Noah's 6th Birthday July 2018 as far as I recall.
At time of writing these archived worlds will run on Minecraft 1.19.3.

See these links to resurrect these worlds:
https://github.com/gilesknap/k3s-minecraft
https://github.com/gilesknap/k3s-minecraft/tree/main/giles-servers#readme

The zip files of the worlds themselves are on my NAS at /share/bigdisk/minecraft-k8s-backup/. But are also backed up into Google Drive here: Minecraft-k8s-backup

Also see historical screenshots from dad's workstation ScreenShots.

Noah Dad Survival 2018

Our first ever world. I remember us stumbling across our first village and meeting an Iron Golem but not knowing if it was friendly or not. Noah came to fall in love with Iron Golems and the bath time Minecraft stories he made up for me had many heroic Iron Golems.

We eventually settled down near a village and built a castle on the nearby hill. We did not know that we should take care of the village and ended up trashing it.

- -279 64 14 Our first ever shack where we sheltered overnight for the first ever time! Image below
- -285 50 4 Our first mine entrance
- -353 102 81 Our castle
- -295 72 128 Our farm with livestock and crops plus a farmhouse with crafting tools.
- -326 69 125 Entrance to our second mine

Noah and Dad's first ever overnight shelter.

Mansion World 2019

Very early, creative world for Noah and dad - lots of experimenting with admin commands. We started off by tooling up in creative and then trying to storm a mansion in survival mode. But then degenerated into just messing around and building big stuff.

Noah used to tell me stories based on Minecraft at this time and one of the most important characters was Iron Golem Grandad. He was created on this map and is safely hidden away in his private lair

- Iron Golem Grandad lair -22380 116 467
- The mansion we built is just above and the (generated) mansion we stormed is visible from it.
- Also contains some of Noah's early MC Transformer builds. Plus a king titan (black) and mega mech (blue yellow white) from Ark Survival Evolved.

Iron Golem Grandad

Transformers Best

Noah took to making transformers out of minecraft blocks and this world has probably the best and most extensive examples

- -231 100 -6 Dad's treehouse surrounded by Noah's Transformers
- There is also a secret base Noah made inside a giant mushroom but I can't find it …

Science Lab 2020

Noah and dad built a science lab here (we were working from a book that did real world and in game science - but I can't find any reference to it now). May 2020.

Noah and Dad proudly posing with our Lab in the distance behind.

Also see 2020-05-24_12.11.25.png

We were quite proud of our lab and it has wonderful views over the ocean. Plus there is an underground 'redstone museum' that demonstrates things you can achieve with redstone.

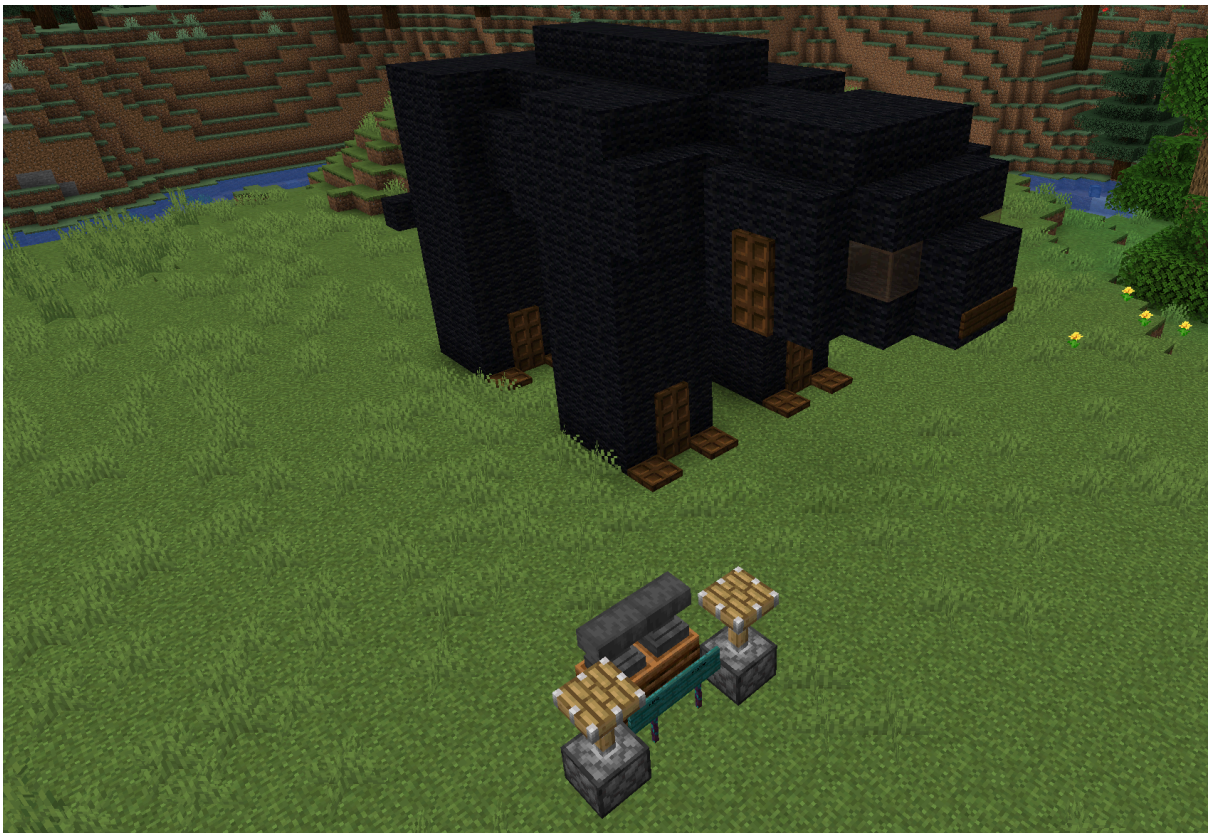

To the left of the lab entrance the nearest cliff has a door that enters the door mechanism and door chime red-tronics. Inside you will see the Door Helper. Two Wither Skeletons guard the entrance to the mechanical door.

- -14082 84 4095 Science lab and museum
    - Plus some teleporters that go to the following
- 365.72 73 -1232 Scenic railway ride (this was part of the book I think)
- -900 70 -498 Dad's massive castle (built from Minecraft Magazine Spec)

Millie 2020

Noah's Minecraft model of Millie the labradoodle! You can enter a secret base in her left front paw. Inside you will find Millie the dog and Jakey the cat.

- -275 68 -242 Millie

Animal World 2020-2021

A creative world from minecraft realms that Noah, Tommy, Jensen and James played on a lot. They added all sorts of crazy stuff and did have a few spats too! One story I remember in particular was that Jensen was chasing James with a pack of wolves and James set off a trap which blew up his pack!

They created The Emerald City which floated in the void and you could reach via portals through the nether. It is believed to have been destroyed and was probably lost when the realm backups got corrupted. However we have a local copy and it may still be in there somewhere!!!

Noah told me great stories of the battles of Emerald City.

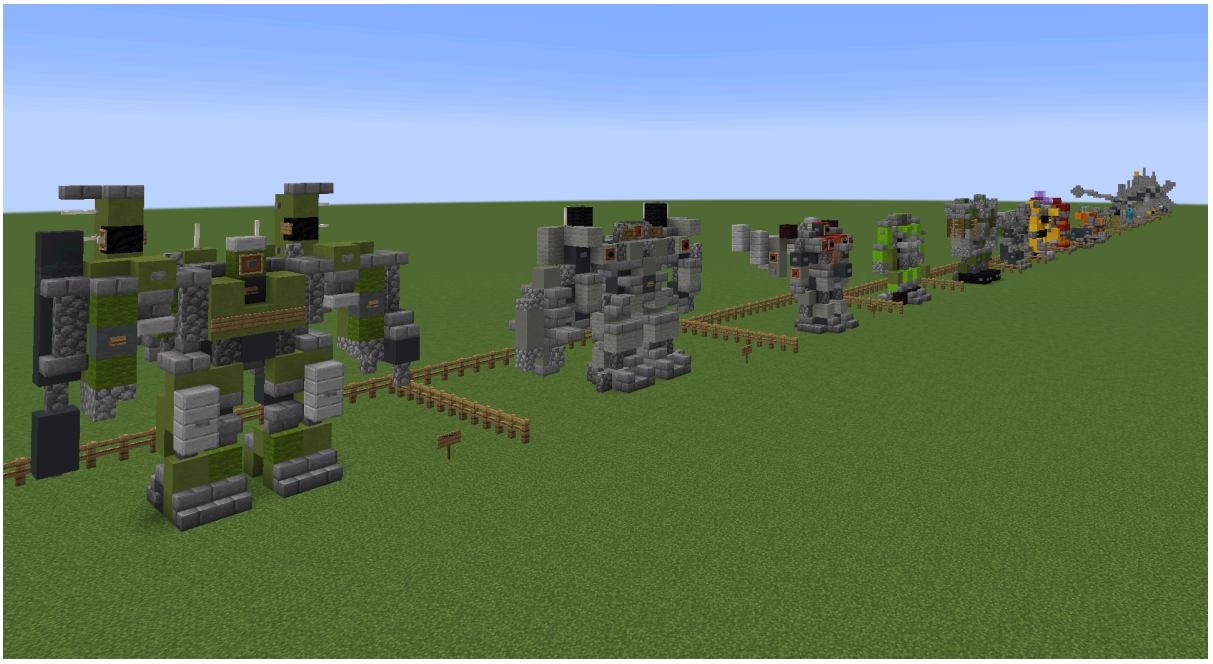

The below image of animal world is from May 2020 and predates much of the crazy builds.

- 60 127 -12 - Noah's graves for his fallen Iron Golems
- -28 101 145 - Shrine to the KingsTrident (see lockdown krew)
- -1 102 10 - the head of "the infinite serpent"
- -3 99 125 the hole where Jensen's wolves stood on a pressure plate and were blown up! (survivors fell into the void)
- -34 121 52 Noah's Reaper Queen (from Ark Survival Evolved Aberration)

Transformers again

A flat world just containing Noah's latest representations of Transformers using blocks

The Lockdown Krew 2020-2021

This map was used by Noah, Tommy, Jensen and James to hang out together during the Covid 19 lockdown. There was a central base built by dad which enforced adventure mode and then teleporters for each player to go to their own creative area.

The image is from May 2020 but they played in it for months.

One heart-rending moment was when Noah lost ‘The King's Trident’. It was a powerful weapon he made with enchantments and it fell into the void when he was battling the ender dragon with his mates. He was distraught and I tried to make him a replacement including a repeating chest that could make new ones but it was never quite the same. Noah made a shrine to the King’s Trident in Animal World.

- -19753 86 -17990 The dispenser crate for ‘The Necromancers Trident’ in Noahs Creative World. My attempt to replace the lost Kings Trident.
- 43 61 -100 The teleportation vault underneath the shared base which takes you to individual Creative Areas. Note there are also teleporters outside which take you to interesting biomes

Noah James 2022

The final days of Minecraft? Noah and James played together on this server in 2021-2022. Lots of building and a few battle re-enactments. They are both 10 and have been playing MC for maybe 4 years or so - this world has the pinnacle of their building skills (at time of writing).

- Spino at the mangrove -5037 63 4120
- Noah and Giles' Underwater base -3523 52 2313
- Also Giles' deinotherium, Noah's megatherium and other animals
- Teleport System -3767 64 2261 (a series of teleporters that take you in a loop to the following:-
- TP to the village and underground pyramid (predator style!) -999 100 -209. Noah and I worked on the pyramid together. It is unfinished and maybe our final MC project?
- TP tp Also to lakeside village with many buildings by Noah and James -48 6312 74
    - Including Noah's secret base -1214 73 77
- TP to James round house -1284 88 -536
- TP to Noah's cliff base -3895 115 2596
- Noah's Shack! -1154 124 -282
- Noah's Japanese Temple
- James' Bunker -1211 101 -240
- Noah's Therizinosaurus stalking the chunky pond guy!
- Millie's house (by Noah) -1050 72 376
- Noahs Forge (with blacksmith HAMMER) -3616 71 3098

Last Played August 2022.
Both played again in Feb 2023
